

Meet Lance.™

He was just diagnosed with diabetes...

People with diabetes are at higher risk of serious health complications.¹

Blood glucose monitoring is a critical part of every diabetes management plan.

When testing blood glucose levels, it is important to get a proper blood sample. Lance's healthcare team gave some useful tips for reducing the discomfort of pricking his finger.

Helpful Testing Tips

When testing, it is important to get a proper blood sample. Lance's healthcare team gave some useful tips for reducing the discomfort of pricking his finger.

Tip 1

Read instructions. Learn how to properly use a lancing device.

Tip 2

Adjust depth setting on the lancing device to comfortably get a usable sample on first try.

Tip 3

Use a new lancet every test to prevent infection and reduce discomfort.

Old lancets become dull, making fingers sore.
Use a new lancet every test.

Types Of Lancets

Lancets come in different gauges (diameters) and with various tip designs and angles to make getting a blood sample more comfortable.

Lancets

Single-use lancets are made for one use and should be disposed of in a sharps container according to local regulations.

Tip: Look for lancets that have a universal fit with most lancing devices.

Safety Lancets

Safety lancets are spring-loaded and auto-retract, and are meant for single-use. Healthcare professionals usually use safety lancets to reduce the risk of infection between patients.

Tip: Safety lancets are also convenient for travel.
